MULTI PURPOSE SHIELD

The Multifunction Shield and its system increases the safety of operational staff (Operating Officer), its efficiency and offers new opportunities in tactics in controlling the riot control.

The shield is a non-lethal anti riot system, which with its appearance and psychological effects (led light pointer, alarm/siren, spark and electroshock sound effect) affects the opposite side, which greatly helps to avoid physical contact between the opposing sides.

The Multifunction Shield is an innovation to defend against flying objects and strokes, the most functional in terms of modern equipment for police officers, soldiers or security guards.

The Multifunction Shield increases the safety of operational staff (Operating Officer), its efficiency and offers new opportunities in tactics in controlling the riot control.

The shield is a non-lethal anti riot system, which with its appearance and psychological effects (led light pointer, alarm/siren, spark and electroshock sound effect) affects the opposite side, which greatly helps to avoid physical contact between the opposing sides.

Security key (pin) is provided in case of alienation of the shield activates an alarm sound and prevents the use of electroshock device. The canister itself is no longer useful and should be activated only with a Shield Spitting Cobra.

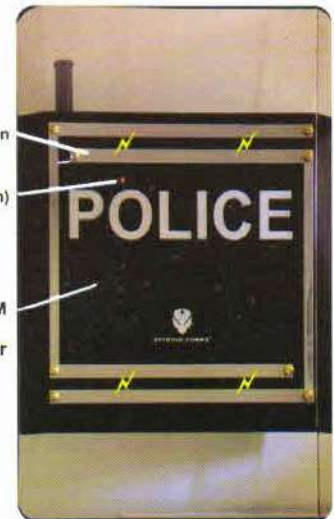

Transparent shield plate made of polycarbonate LEXAN® brand, which has been tested in restoring order at mass gatherings and for interventions in the riots. Polycarbonate shield bears great features: durability against shocks, high chemical resistance, heat resistance, UV protected.

All shields have folded edges, which increases user safety and increases the compactness of shield horizontally and vertically.

Ballistic Option is also available.

- ELECTROSHOCK SYSTEM**
1. Voltage: 150.000V
 2. Electric Current 1.7A
 3. Re-supply (rechargeable)
 4. Duration: 35 minutes of Continuous operation
 5. Recharge time : 45 minutes of loading
- LED LIGHT POINTER (Laser pointer Imitation)**
1. Supply 3 standard LR44 batteries
 2. Wavelength: 650nm
 3. Range: >400 m
 4. Color: red

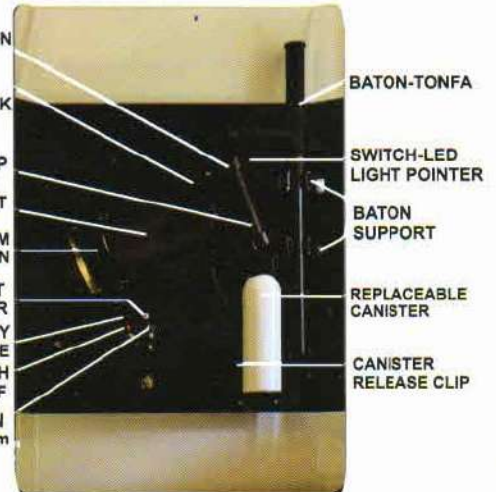

- SPITTING SYSTEM**
1. Range: up to 8 m
 2. Replaceable canister

- SPITTING BUTTON SWITCH**
1. POSITION-ALARM/SIREN
 2. POSITION-ELECTROSHOCK

- HANDLE-GRIP**
- ARM SUPPORT**
- BELT FOR ARM FIXATION**
- LED LIGHT INDICATOR**
- SAFETY FUSE SWITCH ON/OFF**

- ACTIVATION-SECURITY KEY/PIN**
1. Nylon cord with loop length of 80 cm
 2. Clasp to set the size of the loop
